Asymmetry	6	2.70

Study Design

A retrospective, multi-centre, non-comparative, post-market analysis.

Multi-centre: 4 UK sites, 1 Argentinian site and 1 Belgian site.

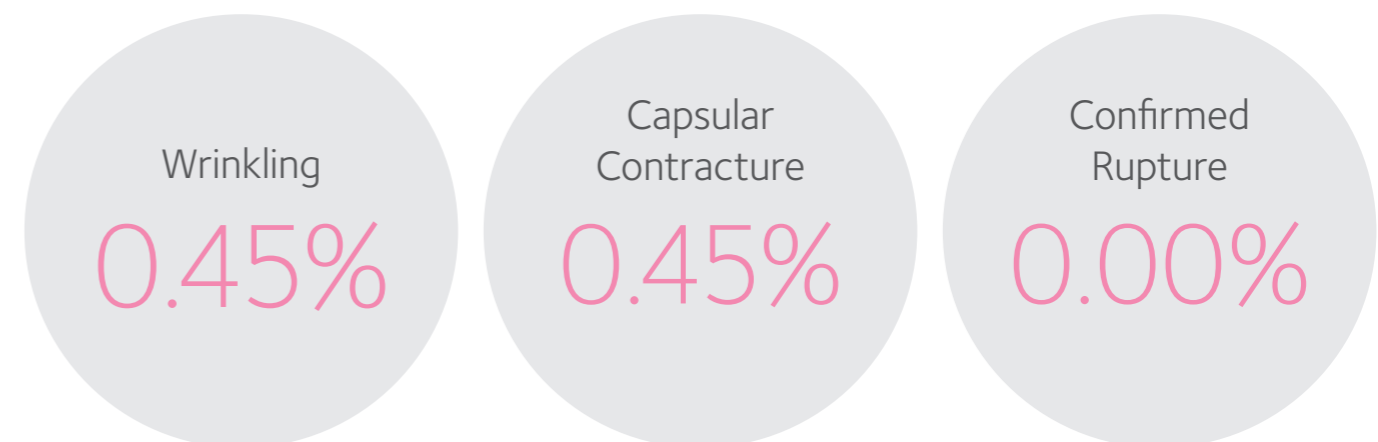

¹. Internal data - Expecting publication of post-market analysis in 2017.

Average patient follow-up time: 2.2 years (range 0-5 years).

Total of 600 subjects are available. Surgical records will be accessed and a case report form (CRF) completed upon patient recruitment.

Nagor Retrospective IMPLEO Study¹

IMPLEO Silicone Gel Breast Implants

Patient Satisfaction Questionnaire¹

91% of patients agreed/strongly agreed that their expectations had been met.

92% of women would chose IMPLEO again (if required).

"I like everything about them, they give me confidence and exactly what I wanted!"

"Just like before I had my children!"

"They have a natural look and feel, they're just perfect really."

"The best thing I have ever done!"
